

Table 2**Materials to be Submitted When Applying for a Designated Battery Mercury or Cadmium Content Confirmation Document**

Applicable Group	Materials to be Submitted
Manufacturers	1. Application form. 2. Photograph of the exterior of the designated battery 3. Designated battery mercury content or mercury and cadmium content test report issued within the past three months by an inspection and testing organization authorized by the central government competent authority to perform designated battery mercury and cadmium content testing. In the case where a manufacturer produces a number of designated batteries with different brands, models, specifications or external appearance, a separate test report must be submitted for each different type. 4. In the case where the battery is not marked with the name of the country of manufacture and with the battery type in either English or Chinese, the application must be accompanied by a certificate issued by the manufacturer, in Chinese, confirming that it is the manufacturer of the battery in question, or by a certificate confirming the country of manufacture, as appropriate; if a photocopy is submitted, it must bear a note confirming that it is a true copy of the original. 5. If the certificate confirming the country of manufacture or the identity of the manufacturer is not issued in Chinese, then a Chinese translation must be submitted along with the original document; the Chinese translation must include a note confirming that it is an accurate translation of the original. 6. In the case where the battery is not marked with the name of the brand, a sample of the packaging in which the battery is sold, or an external design drawing, must be submitted. 7. An affidavit of self-regulation.(see attachment) 8. Such other documents or materials as may be specified by the competent authorities.
Importers	1. Application form 2. Photograph of the exterior of the designated battery 3. Designated battery mercury content or mercury and cadmium content test report issued within the past three months by an inspection and testing organization authorized by the central government competent authority to perform designated battery mercury and cadmium content testing or by an International Laboratory Accreditation Cooperation (ILAC) accredited facility. In the case where an importer imports a number of designated batteries of different brands, models, specifications or external appearance, or where a single manufacturer undertakes battery manufacturing in more than one country, a separate test report must be submitted for each different type and each different country. 4. In the case where the battery is not marked with the name of the country of manufacture and with the battery type in either English or Chinese, the application must be accompanied by a

	certificate issued by the manufacturer, in Chinese, confirming that it is the manufacturer of the battery in question, or by a certificate confirming the country of manufacture, as appropriate; if a photocopy is submitted, it must bear a note confirming that it is a true copy of the original. 5. If the certificate confirming the country of manufacture or the identity of the manufacturer is not issued in Chinese, then a Chinese translation must be submitted along with the original document; the Chinese translation must include a note confirming that it is an accurate translation of the original. 6. In the case where the battery is not marked with the name of the brand, a sample of the packaging in which the battery is sold, or an external design drawing, must be submitted. 7. An affidavit of self-regulation.(see attachment) 8. Such other documents or materials as may be specified by the competent authorities.
--	--

- Notes:
1. When applying for a confirmation document the date on which materials are deemed to have been submitted shall be the date of receipt by the competent authorities.
 2. The date of issue of test reports must be no earlier than three months prior to the date of submission.
 3. The battery submitted for testing by the manufacturer or importer must be of the same type and model as the designated battery to be sold in Taiwan.

Affidavit of Self-regulation

This Company hereby warrants that, on being issued with a designated battery mercury and/or cadmium content confirmation document by the competent authorities pursuant to the public announcement *Restrictions on the Manufacture, Import, and Sale of Dry Cell Batteries*, we shall comply with the provisions of the *Waste Disposal Act* and all other relevant laws and regulations, and shall accept any penalty or punishment that may be imposed for violation of such laws and regulations. In the event that the Company receives any unlawful benefits, we shall accept the increased penalty and/or requirement to make restitution of unlawful benefits pursuant to Articles 18 and 20 of the *Administrative Penalty Act*.
